- 2" thick jacket or less       over 2" thick jacket or foam insulation

**Hot Water Controls:**

- none       hot water thermostat on cylinder       hot water timer or from central heating

**Note: This form must be completed and returned with your grant application. If any works are indicated as being necessary they will be included in your grant application (up to the maximum grant available for the property), therefore it is essential that 2 estimates are obtained and submitted along with estimates for the rest of the works. Failure to submit estimates for energy efficiency measures will result in the approval of your grant being delayed.**
